

Back-Painted Glass • Glass Marker Boards • Magnetic Marker Boards

Glass markerboards are typically more durable than porcelain, but we take that to the next level by applying a ceramic color coating before heating our boards to over 1200 degrees Fahrenheit. This fuses the color into the glass at a molecular level so it doesn't chip, flake, or scratch off.

Make any markerboard magnetic

Post announcements, add documents to presentations, or simply hang decorations with optional magnetic functionality.

Back-Painted Glass • Glass Marker Boards • Magnetic Marker Boards

Discover the benefits and beauty of back-painted glass.

Functional, and aesthetically pleasing, back-painted glass brightens up a space, infusing color and style.

Glass can be recycled repeatedly, making it an **eco-friendly design option**.

Resistant to Corrosion & Bacteria

Because of its non-porous surface, which doesn't allow air or water to pass through, **glass isn't as vulnerable to corrosion or bacteria and mold.**
