### COUNTER TOP DISPENSER

Our counter top dispensers have the **ability to use either Foaming sanitizer or Liquid sanitizer. These units can not use gel sanitizers.** The counter top unit has a heavy weighted base so it will not tip over. Base has a beautiful epoxy coated white gloss finish to fit in any decor. Base also has an anti-slip felt pad on the bottom.

**Essential dispensers help reduce infection and the spread of bacteria. A sanitizing station is perfect for use in any common area** such as retail locations, banks, lobbies, hospitals, restaurants, schools, cafeterias, reception areas and grocery stores.

- Dispensers hold 1200 ML of foaming or liquid sanitizer (sold separately).
- Uses six AA batteries (not included).
- Internal switch gives you 3 dispensing volume options.
- 18" High x 7" Wide x 9" Deep.
- Infrared Sensor for touchless operation.

### WALL MOUNT TOUCHLESS

Wall mount hand sanitizer with attached drip tray is a great way to give your customers the knowledge that your store is prepared to do whatever it takes to keep sanitized. **Our dispensers have the ability to use either Foaming sanitizer or Liquid sanitizer. These units can not use gel sanitizers.**

**Essential dispensers help reduce infection and the spread of bacteria. A sanitizing station is perfect for use in any common area** such as retail locations, banks, lobbies, hospitals, restaurants, schools, cafeterias, reception areas and grocery stores.

- 10-1/8" High x 4-3/4" Wide x 5-1/8" Deep
- Includes mounting screws.
- Includes drip tray
- Infrared sensor for touchless application.

### FOAMING HAND SANITIZER LIQUID

**(1 Gallon containers minimum 4 gallon purchase)**

Our foaming solution is alcohol free with the active ingredient of BZK (Benzalkonium chloride) which is used in many commercial sanitizing wipes. Available in 1 gallon containers.

Solution starts out as liquid, but when used in our dispensers, the dispenser will dispense a dollop of foam.

Active ingredient: Benzalkonium chloride 0.1%.
